DETAILED ACTION

1. Claims 1-22 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a self-carbonating cleaning solution, classified in class 510, subclass 281.
- II. Claims 13-18, drawn to a method of cleaning textile fibers, classified in class 8, subclass 137.
- III. Claims 19-22, drawn to a system for cleaning textile fibers, classified in class 68, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the composition of Group I can be used in a materially different process such as in a method of cleaning dishes.

The inventions of Group I and Group III are distinct, each from the other, because the invention of Group I, drawn to a self-carbonating cleaning solution, is materially different and patentably distinct from the invention of Group III which is drawn to a system for cleaning textile fibers.

Art Unit: 1751

The invention of Group II and Group III are distinct, each from the other, because the invention of Group II, drawn to a method of cleaning textile fibers, is materially different and patentably distinct from the invention of Group III which is drawn to a system for cleaning textile fibers.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to James Harvey on May 2, 2005, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory R. Del Cotto whose telephone number is (571) 272-1312. The examiner can normally be reached on Mon. thru Fri. from 8:30 AM to 6:00 PM.
